DETAILED ACTION

Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 46-49, 81-83, 85, and 87-91 (in part), drawn to nucleic acids of SEQ ID NOS: 40 or 42, or nucleic acids encoding proteins pertaining to SEQ ID NOS: 39 or 9, and host cells comprising same, classified in class 536, subclass 23.5, for example.
- II. Claims 84 and 87-91 (in part), drawn to nucleic acid comprising two non-overlapping fragments of SEQ ID NO: 40 and host cells comprising same, classified in class 536, subclass 23.1, for example.
- III. Claims 86 and 87-91 (in part), drawn to nucleic acid encoding a protein comprising SEQ ID NO: 27 and host cells comprising same, classified in class 536, subclass 23.1, for example.

The inventions are distinct, each from the other because of the following reasons:

Although there are no provisions under the section for "Relationship of Inventions" in M.P.E.P. § 806.05 for inventive groups that are directed to different products, restriction is deemed to be proper because these products constitute patentably distinct inventions for the following reasons. Groups I-III are directed to products that are distinct both physically and functionally, are not required one for the other, and are therefore patentably distinct. In the instant case the different inventions pertain to different sequences, each of which require a unique search of the sequence

and literature databases. For example, Invention II appears to pertain to nucleic acid encoding a fusion protein. Invention III encompasses full length proteins that can bear very little structural similarity to the full length proteins recited in Invention I. Thus, search and examination of all three inventions in one patent application would result in a serious search burden.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter and separate search requirements, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
